

Petition 04-160 is absolutely absurd! Having XM Instant Traffic and Weather directly impacted my life, i know its sounds funny but it did. Without the traffic report, i would have been stuck on highway 101 north in Phoenix for over 2 hrs due to a tractor/trailer rollover and would have been late for my job and possibly fired! This service not only told me what would be my best option as a detour it also told me how long approx. it would take. Regular, "free," radios services in the metro-phoenix do not offer this kind of convenience at all or when you want it. You have to sit through minutes upon minutes listening to commercials about hair removal and weight loss before you have to sit through news from around the country and last nights sports scores all while traffic is still piling up!!! Don't punish XM and satellite radio because ClearChannel and RadioOne and all of those those other communication companies are not stepping up their game and actually listen to their listeners. I pay for this service and you nor anyone else in this country has the right to tell me how to spend my money!! Sadly this isnt about who's broadcasting what, its about how much money investors are losing because of technology. If they are afraid for their future and their fate, Leave them in the past...I LOVE YOU XM, and i will fight for you as much as i need to!!!
